

MEDIA RELEASE

Ai-Media Extends Record High for Broadcast Captioning Quality

25 November 2015

Australia's leading producer of broadcast captioning, Ai-Media, today extended its run of record high captioning quality results. The company scored 99.4% across content on Nine Network Australia for the quarter to September, matching the result for the June quarter. It is the seventh successive quarterly result over 99%, evaluated on the international NER scale and measured by an independent auditor. Captioning uptime published by Nine and Ai-Media comfortably exceeded 99.9%.

Tony Abrahams, Ai-Media CEO, said "This record score is evidence of the sustained impact of our continuous focus on quality, delivering great outcomes for our clients and their audience. Ai-Media is rapidly growing in broadcast, corporate, government and education sectors globally and a robust, measurable and verifiable quality system is paramount across our suite of services."

About Ai-Media:

Ai-Media is an Australian and UK-based for profit social business that provides high quality speech-to-text solutions for broadcast, government and education clients. The company's Ai-Live internet captioning service was supported by the Australian Government. Using a microphone on the original speaker, the spoken words are sent live to a trained stenocaptioner or "re-speaker", who uses software that converts speech into text that is sent back over the internet to screens read by the client. Ai-Media is Australia's Number One broadcast captioning service, based on total hours delivered in the year to June 2015.
